Post-Graduate Year 1 Pharmacy Residency (PGY1) – (Focus in Family Medicine)

The Northeast Iowa Medical Education Foundation and Waverly Health Center, in affiliation with the University of Iowa College of Pharmacy, Department of Pharmacy Practice and Science offers a Post-Graduate Year 1 (PGY1) Pharmacy Residency. The purpose of this twelve month program is to prepare clinical pharmacy practitioners for practice in ambulatory care settings and to provide significant experience regarding inpatient health-system pharmacy practice.

Residency Outcomes
Graduates of the program will be prepared to:

- Provide advanced patient care services in family medicine and other ambulatory care settings,
- Serve as a member of interdisciplinary patient care teams, and
- Teach other health professionals and pharmacy students and residents about pharmacotherapy.

The residency will emphasize experiences necessary to fulfill the basic requirements for accreditation as a Post-Graduate Year 1 Pharmacy Residency (PGY1) as defined by the American Society of Health-System Pharmacy, including a broad scope and depth of patient care experiences, practice management experiences and a major research project.

Minimum Requirements: A Doctor of Pharmacy degree and prior clerkship experience in ambulatory care. Applicant must be eligible for licensure in Iowa.

Duration: The residency is for one calendar year beginning July 1

Components: Most of the clinical experiences offered in this PGY1 Pharmacy Residency program occur in a family medicine clinic (NEIFPC) and affiliated hospitals where inpatient family medicine pharmacy services are provided. NEIFPC is a NCQA certified PCMH and is the clinic home for a family medicine medical residency program with 18 medical residents. The resident’s responsibilities may include: participation in disease management programs; contribution to patient care activities in the clinic, at inpatient hospital rounds and nursing home rounds; patient education and monitoring; clinical research and quality assurance projects; and assisting in the education and training of Pharm.D. students, medical students and family medicine residents. The resident will develop and conduct a clinical project for presentation and possible publication. NEIFPC has been participating in sponsored phase II-IV clinical drug trials for over 20 years. The resident will contribute to clinical research department activities.

Waverly Health Center Preceptors: Sharon Cashman, R.Ph, (Pharmacy Director), Betsie Frey, Pharm.D. (Residency Site Coordinator), Alicia Jahnke, Pharm.D., BCPS, Colleen Losey, Pharm.D., BCPS.
